1. Qualitative information on consolidated results during the period

(1) Qualitative information on consolidated results

In the first six months of the fiscal year ending March 31, 2018, the Japanese economy continued to recover at a moderate pace, supported by improving corporate earnings and employment conditions. However, despite signs of a pickup in some areas, consumer spending continued to lack strength, partly due to sluggish growth in real wages. Furthermore, the outlook remained unclear due to concerns about labor shortages in the Japanese economy and rising uncertainties in overseas economies.

Against this backdrop, the Matsuda Sangyo Group's precious metals business segment increased the use of production sites in Japan and overseas and stepped up marketing activities, while also working to secure precious metals materials, boost sales of products such as precious metal chemical products and expand its industrial waste treatment outsourcing business. The food business segment worked hard to develop and provide products that address customer needs and actively implemented marketing activities, which included expanding the use of overseas business, as well as domestic business sites, in order to increase sales volume.

As a result of the above, for the first six months of the fiscal year ending March 31, 2018, consolidated net sales were ¥94,282 million (up 19.3% year on year), operating income was ¥2,203 million (up 77.0% year on year), ordinary income was ¥2,422 million (up 69.7% year on year), and profit attributable to owners of parent was ¥1,641 million (up 69.4% year on year).

Performance in the Matsuda Sangyo Group's business segments was as follows.

Precious metals business segment

In the precious metals division, production activity was strong at key customers in the electronics sector, particularly at manufacturers of semiconductors and electronic devices. Against this backdrop, the volume of precious metal recycling and industrial waste treatment handled by the Group's precious metals division increased year on year. Despite a drop in sales volume for silver products, sales volume for gold products and electronic materials increased, and excluding platinum, the price of precious metals rose. As a result, sales overall were higher than in the same period of the previous fiscal year.

As a result, net sales for the precious metals business segment totaled ¥60,180 million (up 19.4% year on year), and operating income was ¥1,390 million (up 74.6% year on year).

Food business segment

In the food business segment, production activity at key customers in the food processing sector was solid overall on the back of rising exports, despite sluggish consumer spending in Japan. In this environment, prices for *surimi* fish paste dropped and sales volume for agricultural products declined. However, sales volume increased for seafood products and livestock products, leading to higher sales compared with the same period of the previous fiscal year.

As a result, net sales for the food business segment were ¥34,131 million (up 19.2% year on year), and operating income was ¥813 million (up 81.2% year on year).

(2) Qualitative information on consolidated financial position

(1) Assets, liabilities and net assets

Total assets

Total assets as of the end of the first six months were ¥77,208 million, an increase of ¥4,492 million from the previous fiscal year end. This mainly reflected increases in cash and deposits and notes and accounts receivable – trade.

Liabilities

Total liabilities as of the end of the first six months were ¥22,568 million, an increase of ¥3,271 million from the previous fiscal year end. This mainly reflected increases in loans and income taxes payable.

Net assets

Net assets as of the end of the first six months were ¥54,640 million, an increase of ¥1,221 million from the previous fiscal year end. This mainly reflected a decrease due to year-end cash dividends paid, outweighed by an increase in retained earnings.

(2) Cash flows status

As of the end of the first six months under review, the balance of cash and cash equivalents (hereafter, "cash") stood at ¥7,853 million, an increase of ¥1,069 million from the previous fiscal year end.

Cash flows from operating activities

Operating activities provided net cash of ¥7 million. This mainly reflected the difference between cash provided from profit before income taxes, depreciation, decrease in inventories, and dividend income on the one hand, and cash used due to increase in notes and accounts receivable – trade, and income taxes paid on the other. Compared with the same period in the previous fiscal year, when operating activities provided net cash of ¥1,091 million, cash from operating activities decreased by ¥1,083 million.

Cash flows from investing activities

Investing activities used net cash of ¥1,076 million. This was mainly due to the purchase of property, plant and equipment, such as factory land and equipment. Compared with the same period in the previous fiscal year, when investing activities used net cash of ¥1,289 million, cash used by investing activities decreased by ¥213 million.

Cash flows from financing activities

Financing activities provided net cash of ¥2,131 million. This mainly reflected cash used due to year-end cash dividends paid, outweighed by cash provided by proceeds from loans. Compared with the same period in the previous fiscal year, when financing activities used net cash of ¥1,001 million, cash from financing activities increased by ¥3,133 million.

(3) Qualitative information on consolidated earnings projections

In light of results for the first six months of the fiscal year, the Company has revised its consolidated earnings projections for the fiscal year ending March 31, 2018, which were announced on May 12, 2017. For more details about the revisions, please refer to the news release, "Revisions to Earnings Projections," dated November 9, 2017.
